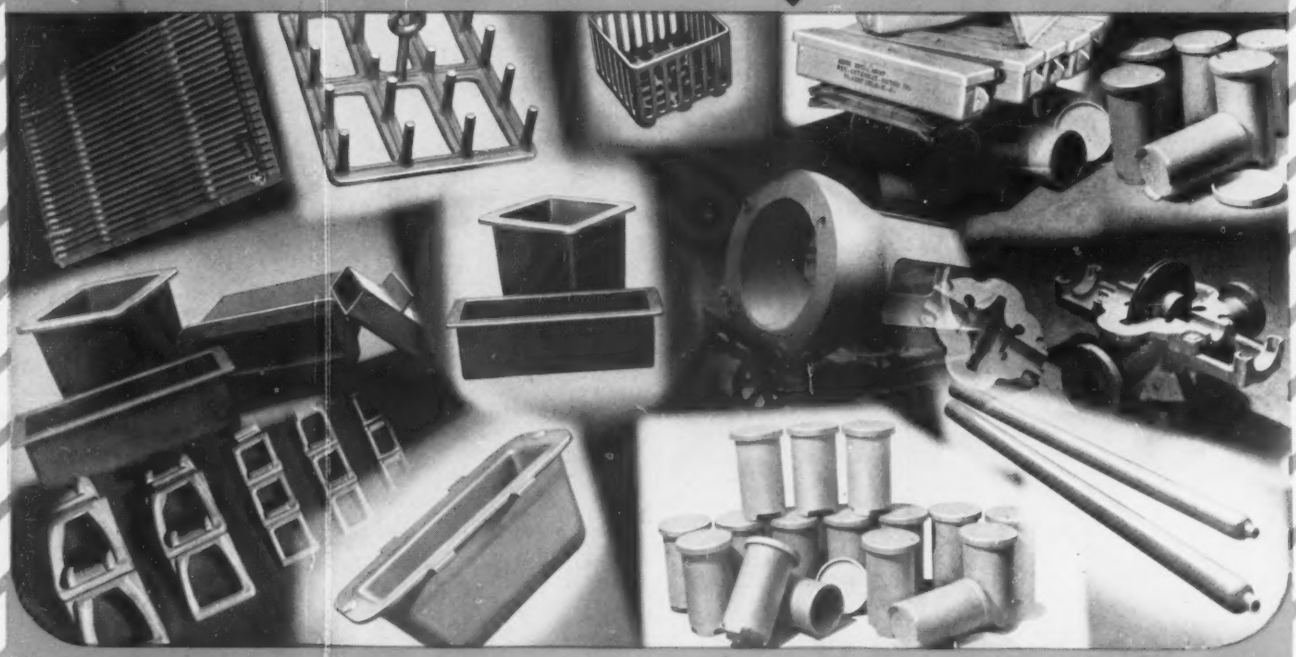
We're Ready!

—to work with you on your heat-treating and brazing problems and show how Hoskins Electric Furnaces fit into your picture.

—to help you with improved design of your alloy castings, and show how Alloy No. 502 lowers your heat-hour cost.



We've made electric furnaces and nickel-chromium alloys for 35 years. The furnaces are in pot and box types. The hydrogen brazing furnace has a heating chamber 6½" wide x 5", or less, high. Hoskins Furnaces are being widely purchased for metal-working munition contracts.

Our nickel-chromium alloys are made as castings, and as rolled rod. To insure uniform composition and properties, all these alloys are melted in high frequency furnaces. The performance of these alloys will please you. We invite your inquiry.... Hoskins Manufacturing Company, Detroit, Michigan.

HOSKINS PRODUCTS

ELECTRIC HEAT TREATING FURNACES • • HEATING ELEMENT ALLOYS • • THERMOCOUPLE AND LEAD WIRE • • PYROMETERS • • WELDING WIRE • • HEAT RESISTANT CASTINGS • • ENAMELING FIXTURES • • SPARK PLUG ELECTRODE WIRE • • SPECIAL ALLOYS OF NICKEL • • PROTECTION TUBES

HEATING ELEMENT WIRE
Chromel
NICKEL-CHROMIUM
